

European Network of digital health focused DIHs

DIHs over the borders

April 20 – 2021

Andrea Jester

a.jester@nsbproject.com

THE CHALLENGE

Healthcare systems across Europe have been heading towards digital transformation for the last decade but it has been a slow process.

Can connected DIHs help?

THE MISSION

Reinforce European relationships among local and regional
technology focused intermediaries
thus expanding their “service” potential
to “end users” or “technology developers & testers”:

CONNECTING THE DOTS

EUROPEAN COVERAGE

1 Topic:
Digital Health &
Technologies

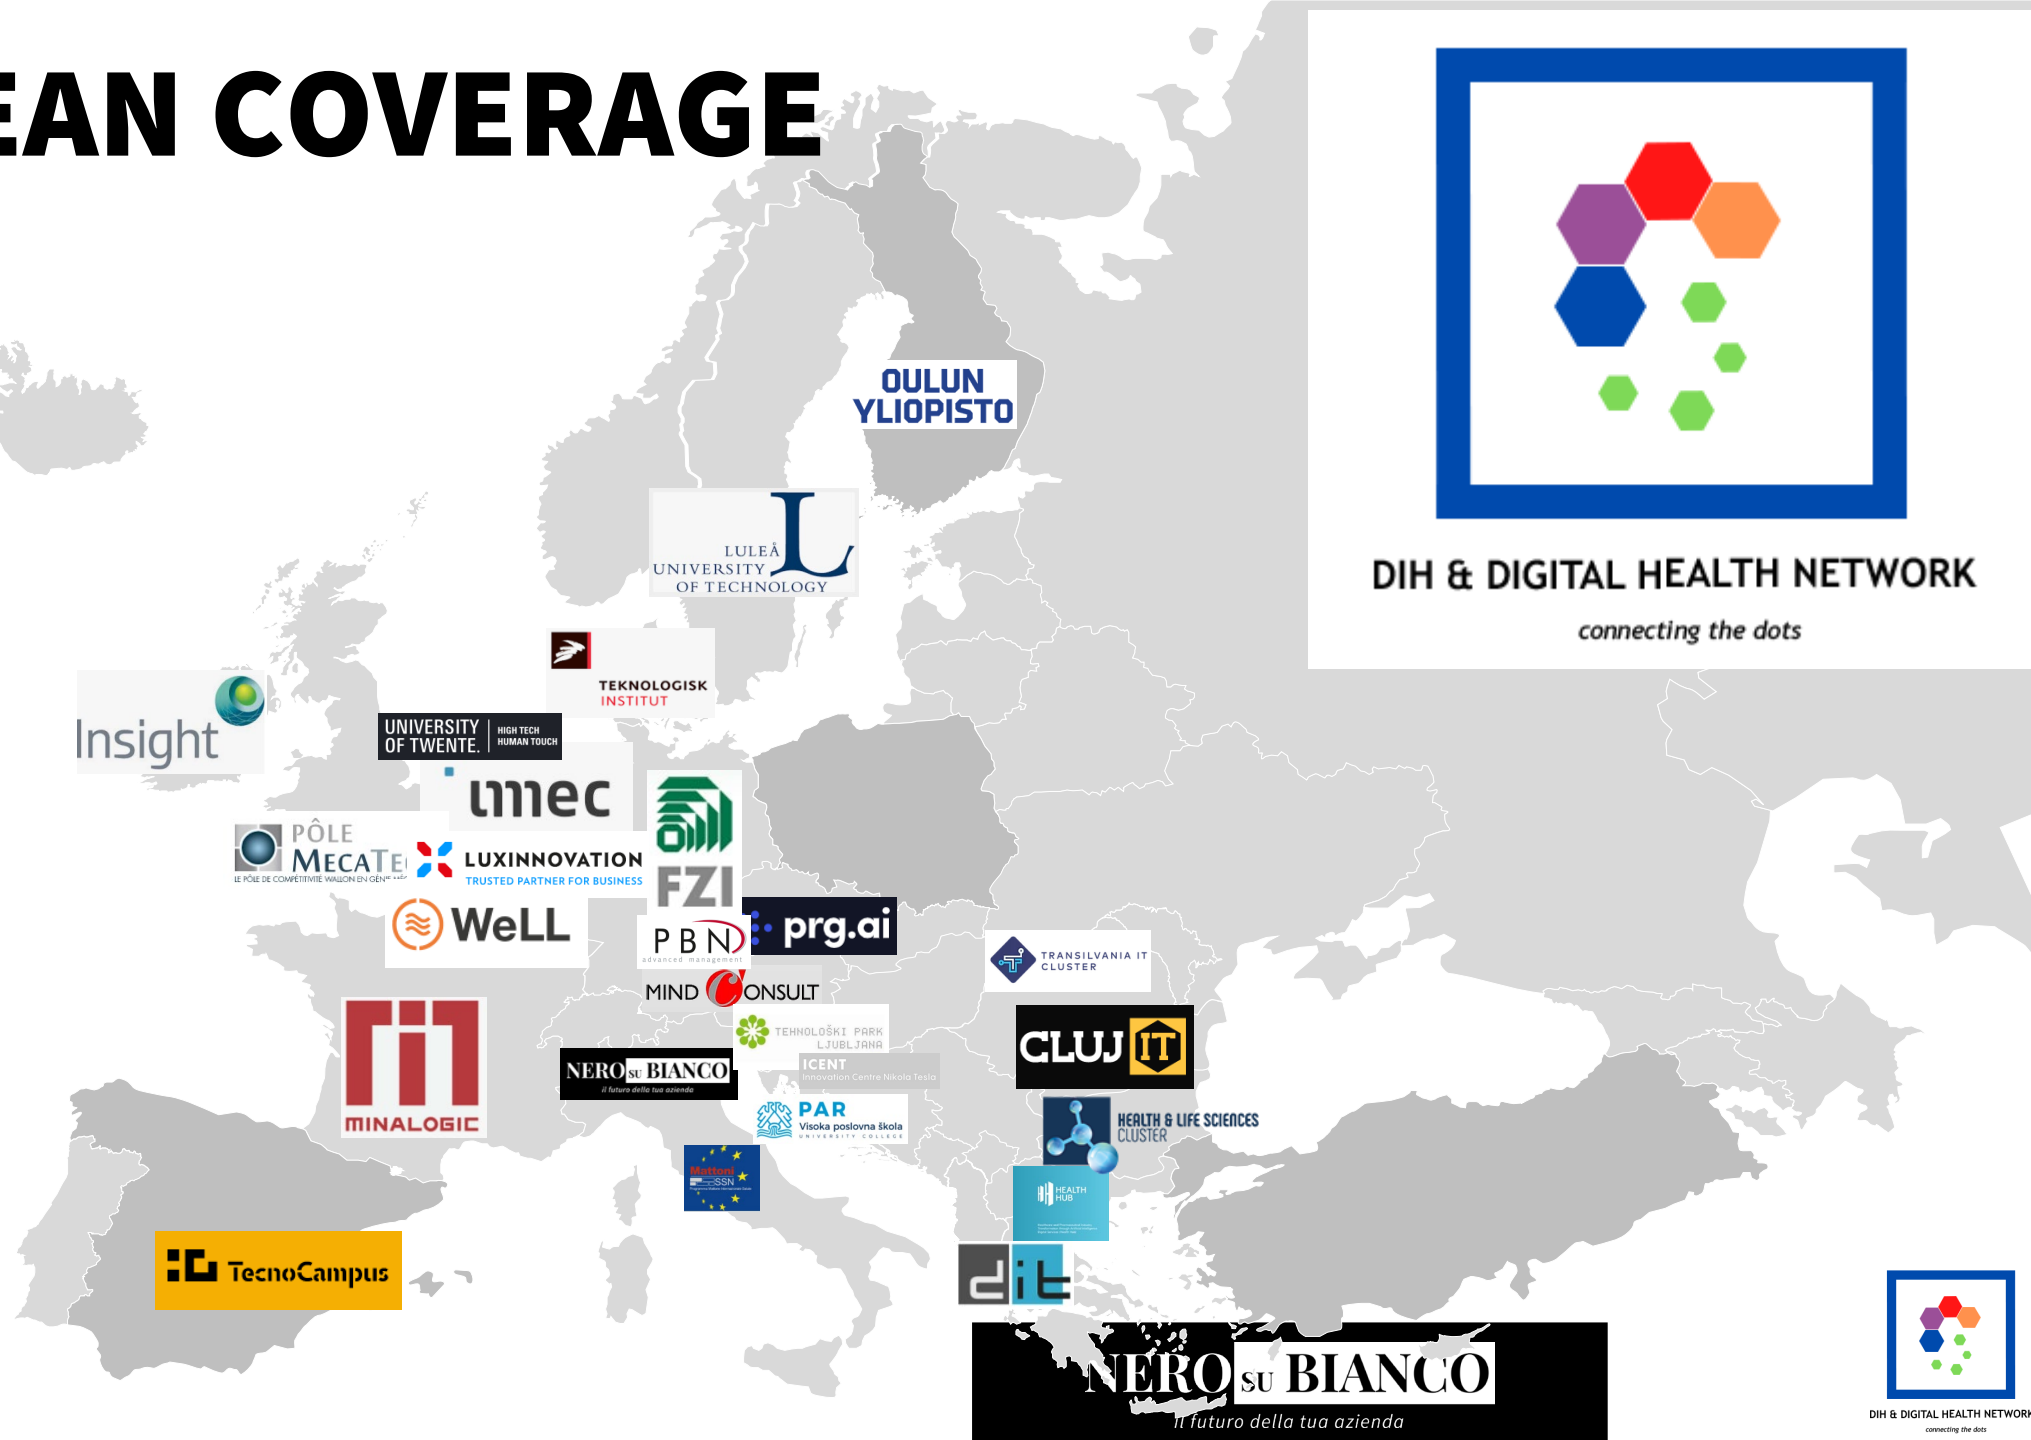

24 DIHs

1 Coordinator

DIH & DIGITAL HEALTH NETWORK

connecting the dots

ENGAGED STAKEHOLDERS

Country	Organization
Austria	Mind Consult & Research
Belgium	IMEC
	Well Living Lab
	Pole Meca Tech
Bulgaria	Health & Lifescience Cluster
Croatia	PAR University College Innovation Centre Nikola Tesla
Czech Republic	PRG AI Hub
Denmark	Danish Technological Institute
Finland	University of Oulu
France	Minalogic
Germany	FZI Forschungszentrum Informatik
Greece	National & Kapodistrian University of Athens
	Institute of Entrepreneurial Development

Country	Organization
Hungary	Pannon Business Network AM
Ireland	Insight Centre
Italy	Promis
Luxembourg	Innolux
Netherlands	University of Twente
Norway	University of Agder
Romania	Transilvania IT Cluster
	Cluj IT Cluster
Slovenia	Technology Park Lubjana
Spain	Tecnocampus Barcelona
Sweden	Lulea Technical University

TOPICS

- Silver generation focused solutions & assistive technologies
- Digital empowerment & health literacy
- Artificial Intelligence
- Data Driven Decision Support
- Smart Medical Devices
- Use and Reuse of Health Data
- Setting Up a Smart Health Digital Innovation Hub

COOPERATION

- **Working Groups** to jointly work on specific HEurope Topics
- Develop **Corridors** among participating Hubs
- Facilitate **transfer** of available solutions from one hub - and its ecosystem - to another
- **Facilitate & accelerate connections with running initiatives** (good projects where providers or healthcare system players can look at the state of the art of specific technology domains)

OUR ACTION PLAN UNTIL DEC. 2021

- **Network coordination:** 4 online meetings
- 1 or 2 **thematic webinars** which may be opened to interested stakeholders which could act as a “public showroom” for our initiative and where we may focus on a specific topic and give the floor to those DIHs that have relevant experiences / use cases. The ideal scenario includes an on-site meeting at **Medica** in November 2021
- **Design 1 or 2 common projects (HEurope / WP Health)** which may involve at least 3-4 of our network members each
- Establish **4 DIH Corridors**
- Formally **connect to the institutional EU platforms** that are focusing on digital health and complementary topics (Active and Healthy Ageing, etc.)
- Finalize a **Business Plan** for 2022-2023 and attract resources to manage the network in a sustainable way
- Identify the most **suitable legal structure** to be adopted by the network
